

Ecosystems and Food Chains

Subject: Biology

Grade: Grade 9

Understand how living organisms interact with each other and their environment.

What is an Ecosystem?

An ecosystem includes plants, animals, and the environment. Everything in the system depends on each other for energy and resources.

Producers and Consumers

Producers, like green plants, make their own food using sunlight. Consumers eat producers or other animals to get energy.

Food Chains and Balance

A food chain shows who eats whom. When one part of the chain changes, it affects the entire ecosystem.
