

UNIT 7: Temperature and Thermometry

Subject: Physics

Grade: Grade 9

Core idea: Heat and temperature behavior.

Heat and Temperature

Differentiate temperature from heat and relate both to particle motion and energy transfer.

Thermometers and Scales

Types and uses of thermometers and reading temperature in Celsius and Kelvin scales.

Thermal Expansion

How solids, liquids, and gases expand when heated and contract when cooled.

Heat Transfer

Conduction, convection, and radiation with examples from home and industry.

Mastery Goal

Apply thermometry and heat transfer ideas to explain everyday thermal phenomena.
